

Circo | Circus

Circo | Circus is the beginning of an exploration of Circus, Vaudeville and Sideshow performers in both the metro New York City and in Granada Spain. During my residency in Spain, I was fortunate to photograph the entire graduating class of Escuela Internacional De Circo Y Teatro, CAU. These students spent three years developing their characters along with immersive training in the circus arts. The images I have created in the NYC Metro area comprise of performers of the stage and have dedicated their lives to the craft of performance. My investigation into these wonderful and mysterious subjects stems from my early childhood and I am fascinated with the mysterious world of costume, performance and the super human feats performed before my eyes. I am consistently inspired by the way these individuals are always pushing themselves to the limits of what they can handle, then they push some more.
